Watch for our female consignments in the Northwest Select Simmental Sale!
Welcome!

I would like to welcome every one to this years 11th annual sale. We have been doing quite a bit of AI and embryo transfer work since the 90’s to build our cow herd with the best genetics available. As you analyze this sale book you will find the heaviest and largest volume set of bulls that we have produced. Please look over the whole catalog as the lots are in order by birth date and you will find top end bulls throughout.

This year we are offering 58 bulls for your selection. At birth the bulls were vaccinated with C&D and Inforce Three. At 3 weeks they were given a Bovishield Gold 5 and an Ultra Choice 7. Then they were vaccinated with One Shot Ultra at turnout. At weaning they received OneShot Ultra 7, Resvac 4/Somubac, and poured with Dectomax then poured again in December with Cleanup.

Preweaning we introduced creep feeders with 1/2 oats and 1/2 creep pellets. We feel this is a safe and effective way to lower stress at weaning and get calves started on feed. Post weaning the bulls were fed a high roughage 48 mcal TMR consisting of chopped hay, corn silage, ground high moisture corn, and dried distiller grain. Along with free choice salt and Flaxlic tubs.

Bulls penned for viewing at 10:00
Lunch served at 11:00
Sale starts at 1:00
We’ll see you on sale day!

Visitors welcome anytime!

Auctioneer/Ring Man
Butch Haugland, Auctioneer................................ (701) 965-6234
Loren Sorenson, Ring Man ..................................(701) 641-1140

Terms & Conditions
All bulls are guaranteed breeders. Purchaser shall let seller know within six (6) months of purchase if bull is unsatisfactory. Bulls will be returned at buyers expense. Seller has the right to semen check the bull. If the bull is found unsatisfactory, seller will replace with a bull of equal value agreed upon by both parties, or return purchase price. In no instance shall seller be responsible for more than the purchase price.

For those who cannot attend the sale, we will honor a phone order and guarantee your phone purchase to meet your request when inspected personally by you. Bulls will be sold to the highest bidder.

Dispute amongst bidders will be settled by the auctioneer by reo-pening the bidding among the parties involved. The auctioneer's decision shall be final.

As we have no control over Acts of God, we cannot guarantee these cattle against death loss or sickness. We guarantee cattle to be healthy sale day.

Certificates of registry will be supplied by the seller to any buyer requesting them on sale day.

Terms of the sale are cash or check at the time of the sale unless other arrangements are made prior to the sale.

We will abide by the rules set forth by the American Simmental Association.

Announcements: Announcements made from the auction block shall take precedence over printed material in this catalog.

Insurance will be available on sale day.

Feeding Arrangements: We will feed bulls free of charge until April 1st, at which time we will coordinate deliveries. We are not responsible for accidents, therefore we encourage you to insure your purchases.
This TJ Diplomat son had an actual BW of 84 pounds out of a first calf heifer and went on to ratio 104 for WW and 110 for YW. Same cow family as Lot 27. Could be used on heifers or cows.

Our SYS Stunning X27 Donor cow has 6 bulls in this years sale and a 7th bull would have been at the top of the order. Unfortunately he was injured in December and won’t make the sale. If we can get him healed we plan on using him ourselves. As for Lot 13 his receipt dam didn’t quite do his genetic potential justice. Homo Black and polled.

BDV MS SOLUTION 7T57

Resource sure clicked with this Stunning X27 Donor. Its truly impressive watching the Resource calves grow on grass and bloom after weaning. Lot 14 looks like the kind of bull that could be used by about anyone looking for pay weight. Homo black and polled. Full sib to lots 16 and 45.

Hailey running the chute!
F45 had an actual BW of 85 pounds and comes from a calving ease line on the cow side. Could be used on heifers or cows.

F53 is for real! EPD’s in the top 1 percent of the breed for Year and ADG and top 5 percent for wean and CW.

If you like them thick and easy fleshing here’s your boy. F53 is for real! EPD’s in the top 1 percent of the breed for Year and ADG and top 5 percent for wean and CW. Homo black and polled.

Red Power bull here in lot 17. He had an actual BW of 95 lbs., then grew to ratio 109 WW and 110 YW. His EPD’s tell the same story with wean, year, and TI in the top 1 percent and 11 EPD’s in the top 10.

This Main Event son should be a potential calving ease sire with his 78 lb. actual BW, and he still had enough gas to go over 700 lbs of WW. Could be used on heifers or cows.

Hailey’s cow raised her another dandy! He put ratios of 101, 106, and 114 for BW, WW, and YW respectively. His EPD’s are about as equally impressive and balanced. The A2 cow has had 4 calves for Hailey now with average ratios of 103 BW, 105 WW and 107 YW.
Lot 22 is a moderate framed, wide based grandson of
CCR Frontier, and the old Donor BDV Miss McKinna S62
who's still here at 13 years old and has the Lot 33 bull.

Lot 23's Dam was purchased at Kunkel Simmentals last year and
it looks like it was a good decision. F73 had ratios of
112 for both WW and YW, and EPD's ranking in the top 1 percent of
the breed for Wean, Year, and TI, along with 6 other traits in the top 10
percent.

D14 is stamping his calves with consistency in their
shape, dimension, and depth of body. F74's Grandam is
still going at 14 years old. Homo polled.

Lot 25's Tanker mama has an average WW ratio of 107
on all heifer calves before this Seedstock son. Keep the
females, they should be good ones. Homo black and
domo polled.

Lot 26's Tanker son is closely related to lot 25 being another Seedstock
son out of a full sister to his Dam. Above average WW
with a ratio of 104. Homo black and homo polled.
This Big half blood sure put up some numbers rationing 103 BW, 104 WW, and 112 YW. His W53 Dam had been consistently raising top calves with average ratios of 100 BW, 110 WW and 111 YW. Homework is done on this one. He will add pounds to your calf crop.

This purebred Cowboy Cut son has the size and shape to stretch a set of feeder calves.

There is some real power in lot 31’s young dam. She had a good Brilliance son in the sale last year and now has average ratios of 108 for both WW and YW after raising this big Seedstock son.
Lot 32 is another stretchy type half blood out of SAV Seedstock and an Enforcer mama.

Lot 35 is going to be a pretty good sized fella when he gets done growing. The only Tenx Excellence in the sale and he's actually a purebred.

Well it's probably been well over 25 years since we've had a calf with this much color to him and it probably won't happen again, but pounds are pounds and Lot 35 has them.

I'm thinking Lot 34 is going to be a pretty good sized fella when he gets done growing. The only Tenx Excellence in the sale and he's actually a purebred.

- **SYS MS TANKER Y68**

This stretchy Main Event son really pushed the scale ratioing 113 WW and 111 YW which bumped his wean and year EPD’s to the top 1 percent of the breed along with MWW. Homo Polled.

____________________________________________________________________
Lot 40 is a low BW Purebred Cowboy Cut son who is smooth made and deep bodied. Homo black and Homo Polled.

Lot 41 is a Blaze faced black purebred bull here in lot 41. He's well balanced both in phenotype and across his own data and EPD's.

Lot 42 is a F127 that has been impressing me with how he is coming together in his overall balance and dimension in a super sound package. Going back to KNH Miss 585 doesn't hurt anything either. Homo black and homo polled.

Lot 43 is the younger brother of lots 9 and 10 in the Frontier x Juliet flush. No holes in this one as well. Homo Black.

Low birth weight bull here out of a first calf heifer that really grew to ratio 105 on YW. He is deep sided and well balanced. Homo Black.
Lot 45 is a super individual out of this outstanding flush of Resource sons and the SYS Stunning X27 cow. 4 growth EPD's in the top 10 percent of the breed. Homo black and Homo polled. Full sib to lots 14 and 16.

Lot 46 is another typical Resource son being moderate, deep, and thick with above average wean and year data. Homo black and homo polled.

Lot 47 is a big time growth bull in a nice looking 3/4 blood package. He ratioed 106 weaning and 110 yearling, and boosted his wean and year EPD's to the top 1 percent. His Red Hot C7 dam was a former show heifer and more importantly is raising the good ones.

Lot 48 is a moderate framed deep sided Frontier son that is smooth made and correct in design. Homo polled.

Lot 49 is the youngest of the Frontier x Juliet brothers and probably most similar to the lot 10 bull. Homo Black
Lot 50: Big weaning weight bull in lot 50 with a ratio of 110 and the cow has been getting that done consistently with an average ratio at 109 WW on 4 calves.

Lot 51: Lot 51 is the number 2 adj. 205 weight bull in his contemporary group of 75, ratioing 116 and then 112 for YW. Check out his balanced set of EPD’s as well, 9 traits in the top 15 percent. The Rosemary A106 cow is doing an excellent job for us, she raised a nice one in last years sale as lot 20 and she’s the grandam of lots 12 and 47 in this sale as well.

Lot 52: This guys young Sante Fe first calf mama did a good job weaning him off at over 800 lbs. We did graduate his sire SYS Frontier D14 to the cows instead of the heifers this year because the calves came just a tick stout for heifers.
Another super deep sided purebred son of SYS Frontier D14. He is going to be a good soggy easy keeping type bull.

Lot 55 looks to be like the other Boulder calves in the sale with their true depth of body starting in the heart girth through the rib cage.

Just an April baby here in lot 57 and the adjustment to 205 was friendly to him but he still had to grow and that he did.

This big red 1/2 blood should really add length and stretch out a set of calves. His dam is a beautiful undated Top Gun daughter with an average WW ratio of 105 on 5 calves.
Thanks for coming to the sale!
The NorthWest Select Simmental Group will be holding a futurity show at the ND State Fair this summer. Open heifers purchased March 9th in Stanley will be eligible for $1,000 in prize money!
