Welcome All to our 14th Annual Sale held here at the farm. I pray you are doing well as we close out 2021 and see optimism looking into 2022.

We are already off to a much better start as far as pasture forages are concerned in our area, anyway. A few fall rains had our pastures in better shape in October than they were all spring and summer. Honestly though, water and water quality was our biggest issue to deal with. We have never had to water cows in the summer before, but in 2021 we spent way more time hauling water than bailing hay. One good runoff should fix most of those water problems. At the end of the day we do everything we can to produce the highest quality, most trouble free bulls possible.

We continue to use AI and embryo transplant heavily in our breeding program. All the females get one chance at AI. We use our own cows off the bottom of the herd for receipt cows, which seems to have a few advantages besides having the ET calves raised the same as all the others. We cull out all the lower end cows every year and have those cows raise our top genetics to put back into the top of the herd, building our genetics faster.

We have 47 bulls on offering for your selection. Pre calving the cows received scour guard and 7 way. At birth the calves were vaccinated with Enforce Three, Then at about 3 weeks we gave them a booster of 7 way and a Bovishield Gold 5, and a One Shot Ultra at turn out. At weaning they received a booster of One Shot Ultra 7, and a Resvac 4/ Somubac, then poured in November with cleanup, and in December with Dectomax.

Pre weaning we introduced creep feeders with 1/2 oats and 1/2 creep pellets. We feel this is a safe and effective way to lower stress at weaning and get calves started on feed. Post weaning the bulls were fed a high roughage 47 mcal TMR consisting of chopped hay, corn silage, dry distillers, and ground corn. Along with a dry mineral, and free choice salt and Flaxlic tubs.

We'll see you on sale day!
